

SAFE SUSTAINABLE MULTI-FUNCTIONAL

Value-Added Flexible Packaging

PACKAGING EXPERTISE

ADDICTED
TO FLEXIBLE
PACKAGING
EXCELLENCE
SINCE 1931

A. Hatzopoulos S.A. develops innovative flexible packaging solutions for the food & beverages, cosmetics, chemicals and pharmaceuticals industries.

Founded by Athanasios Hatzopoulos in Thessaloniki, Greece in 1931, today we are one of the fastest growing packaging converters in the European market. The company operates on a global level -exports to over 33 countries account over 80%- through a well-organized network of sales offices across the world. Our growth is reliant upon investments in cutting-edge technology and infrastructure, research and development of innovative products and continuous training of our employees, who represent our most important asset.

We passionately offer unparalleled packaging products, solutions and services, supporting our customers to improve their packaging efficiency across the value chain.

CUTTING-EDGE TECHNOLOGY

PRE-PRESS

All repro in-house
Cylinder engraving
Flexo plates making
Ink-mixing system

SLITTING

Up to 1.200mm
outer reel diameter

ADD-ON TECHNOLOGIES

PRINTING

Rotogravure
Full-HD Flexo
Both-sided printing
Promotional serial
codes printing

Cold-seal
Lacquering
Laser-scoring

LAMINATION

Solvent-based
Solvent-free
Triplex-in-line

ABSOLUTE
QUALITY

ABSOLUTE
CUSTOMER
CARE

With our custom value-added applications we have been assisting clients to increase the shelf-life and enhance the shelf appeal of their products for more than 95 years. Throughout our long history we learned that successfully addressing client-specific needs requires more than a functional mastery of polymer conversion technology and printing processes. Therefore, and in addition to our specialist knowledge of the flexible packaging materials market, we place equal emphasis on technical excellence and customer care.

Customer Satisfaction is based on:

**Know-How, Experience and our
Client-centric Corporate Culture**

Wet wipes
Cosmetics
Chemicals
Detergents
Pharmaceuticals
Tobacco
Industrial bags

LABELS

Reel-fed labels

FRESHNESS

Modified-Atmosphere Packaging

High-barrier laminates

Puncture resistance

Hermetic sealing properties

Lamination expertise

Our high-barrier, high performance laminates ensure sealing integrity and total protection to lock-in the freshness of your product's delicate flavors and aromas.

Novel advanced materials' structures enable the incorporation of clear windows, while still maintaining the required high-barrier properties against oxygen, moisture and aroma for best product preservation.

SHELF-APPEAL

Awarded printing quality

Matt / Gloss Finish

Promotional Packaging Solutions

Both-sided printing

Serial codes printing

Integrate haptic effects: Tactile, Paper Touch and Soft Touch lacqers

CONVENIENCE

- Multi-functional packaging solutions
- Laser-scoring technology
- Easy-open films
- Adjustable peelability
- Reclosable films
- Cold-seal; optionally reclosable
- Retortable applications

We develop innovative, practical solutions with add-on packaging functionalities that guarantee maximum convenience and an enhanced overall consumer experience.

WPO WORLDSTAR WINNERS 2018-2024, 2026

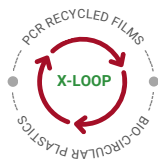

With our eco-friendly solutions we assist our customers in achieving their ambitious sustainability goals.

Our R&D team develops high-end structures with focus on packaging rationalization and optimization according to all product end-of-life design requirements and guidelines for the Circular Economy.

SUSTAINABILITY

- X-CYCLE™** | Recyclable solutions
- X-LOOP™** | PCR & Bio-circular films
- Packaging optimization
- Metal-free packaging
- FSC-Certified Paper solutions

We invest in green production processes, with advanced solvent recovery systems and solar pannels generating renewable energy, to minimize our footprint and our impact to the environment.
